

Without wires,  
without worries

There's something in the air — it's your wireless personal area network.

With the range of wireless products from Xircom, you can connect anytime, virtually anywhere via Bluetooth, 802.11b and GPRS technologies. And you'll connect with confidence because compatibility, reliability and performance are built into every Xircom product.

Bluetooth solutions let you easily connect all your devices — your notebook, your handheld PC, your mobile phone and more — to create a wireless network. So wherever there's air, there's a connection.

With Bluetooth wireless technology, wherever you go, you can seamlessly connect and synchronize address books, schedules and more. You get wireless ranges up to 10 meters, fast 721 Kbps connections, security, and industry compatibility. It's the way to bring the greatest convenience to your mobile lifestyle.
